

Press Release
1000Kva Cummins Generator
Exported to Worldwide Oil &
Gas Equipment Provider.

HALLIBURTONE: enquiries@generatorassociates.com
W: www.generatorassociates.com

Kazakhstan has become the latest country that Generator Associates have been asked to supply power generating equipment to. Halliburton, the fluids brand within a giant oilfield services corporation, required 1000Kva of power and Generator Associates was selected as the ideal supplier.

December 2009

Generator Associates are delighted to have been selected by this US based corporation with operations in more than 50 countries, to supply a 1000Kva Cummins 3 Phase Diesel Generator, alongwith inline entry and inline exit silencers. Halliburton is committed to providing quality products and services to their clients, which fits perfectly with Generator Associates philosophy.

Halliburton's Project Manager Greg Laffan worked closely with Generator Associates to ensure that the equipment was correctly specified. Generator Associates worked for almost a year on the project to ensure it ran smoothly including assembling the exhaust silencer systems prior to collection, to ensure the client simply had to bolt them to the generator upon its arrival in Kazakhstan.

2009 saw an increase in the number of enquiries from Kazakhstan, with other projects including the supply of 3 x 1250Kva Silent Synchronised Generators including HV equipment. *"Generator Associates were quick to respond to my enquiry, with competitive pricing and detailed specification. When I needed information quickly, or some amendments they arranged it, just like they said they would. I am so happy with the service and equipment I have received, that I have already passed further enquiries to them, as well as referring others in my industry to them"* Project Manager, Halliburton.

Because the end user was in Kazakhstan, Generator Associates arranged for an engineer from Halliburton's UK office to attend a witness test at the Cummins factory, which was also attended by Chris Stevens of Generator Associates. *"I enjoy seeing the projects come alive, and the witness tests are a good time to get the clients involved with their equipment. A sound relationship between sales, technical, installation and the client is vital and it is part of my job to ensure that this happens"* Chris Stevens, Director.

Whether it is **Generator Hire, Generator Supply, Generator Lease** or **Generator Maintenance** you require, Generator Associates act as independent consultants and offer complete one-stop solutions for commercial and industrial organisations worldwide.
