

Press Release

Charnwood Borough Council Once Again Select Generator Associates to Supply & Install a Diesel Generator.

E: enquiries@generatorassociates.com
W: www.generatorassociates.com

Generator Associates have been selected to provide & connect a 3 phase diesel generator solution for Charnwood Borough Council. It is the latest in a series of projects the Authority have asked Generator Associates to undertake.

October 2009

Generator Associates who earlier in 2007 provided complete Project Management services to the Local Authority, including finding suitable partners for the provision and installation of equipment to the switch room, are delighted to have once again been selected for the provision and connection of a temporary hire generator and ancillaries.

One of the value added services the Local Authority may wish to take up with a host of other clients, is the competitively priced and reliable Fuel Management services offered from this rapidly expanding and flexible Generator hire, supply, lease and maintenance company. Nothing is too much trouble for them, because they have a truly customer-focused approach to business.

Generator Associates along with their partners are currently developing a **Power Optimisation Package**, which offers clients a massive average **saving of between 10-20% on their electricity bills**. The tried and tested equipment also reduces equipment maintenance and replacement costs and CO2 Emissions. All they need to know is some usage details of the facility - please contact them today if you are an organisation who wants to save money, on electricity bills, equipment maintenance costs and reduce your CO2 emissions. This is something the Local Authorities are increasingly interested in.

Whether it is Generator or UPS supply, hire, lease or maintenance you require, Generator Associates can act as independent consultants and offer complete one-stop solutions for businesses and organisations throughout the UK. If you need a reliable and competent Generator supplier who can offer a range of services including Project Management and Fuel Management, contact Generator Associates today and let them start finding the most cost-effective solution for you.

For Immediate Release

-End-
