**A family led organisation who provide power generators (primary and backup power) on long-term lease, launch their exciting new website.**

February 2006

Generator Associates Ltd announces the launch of their new all singing and dancing website [www.generatorassociates.com](http://www.generatorassociates.com). Generator Associates help busy professionals who know they have a power supply problem, but do not know (or want to know) the technical details of how to solve it. All they want is for an expert to assess their situation and provide a rapid solution, saving them time and money.

With the increasing number of power cuts and blackouts throughout the UK, it is about time someone offered a flexible and cost-effective way of ensuring that during this period, businesses can continue working. Businesses throughout the world have recently experienced the devastating effects of power failures including the UK, US, Italy, and Scandinavia. Generator Associates is the fastest growing auxiliary power generation company in the UK, with over 20 years experience in the supply, financing, installation and service of backup and primary power generation. They supply a range of generators on bespoke leasing from 1kw to 3000kva, and take on your problem as their own.

The fresh and exciting new website details some of the world leading generator ranges they provide, but for those who want a speedy solution and advice on the best generator and finance package, the organisation offers a free initial assessment of your power supply needs.

The most revolutionary part of what Generator Associates offer is that they save businesses the usual large initial outlays required by most Generator companies, by providing their UPS and Generators on bespoke long-term leasing packages. This means a low monthly rental, which takes the sting out of the tail of capital expenditure. For example, you can have a 365kva generator (delivered and installed) for no more than £600 per month!

Benefits of having your generator solution on leasing packages include no capital expenditure, low initial outlay, fixed inclusive low monthly rental, extended lease period, and 100% tax allowances. Whether you are moving to an area with insufficient power supply, or you need additional emergency power, long-term generator leasing provides significant savings. Visit [www.generatorassociates.com](http://www.generatorassociates.com), or call 01623 624005 for further information.

**Notes to Editors**

Generator Associates Ltd are the fastest growing auxiliary power generation company in the UK, with over 20 years experience in all aspects of backup power generation and finance. They supply a range of generators from 1kw to 3000kva, and offer leasing packages to take the sting out of the tail of Capital Expenditure, spreading the financial outlay over an extended period, to generate a low fixed monthly rental. To ensure clients requirements are fully met, they advise, supply, finance, and maintain a wide range of generators and UPS from the worlds leading manufacturers including SDMO and Pramac.
