The noise research department of a leading security technology organisation commissioned Generator Associates to provide an 800Kva silent diesel generator solution to power their off air exhauster units. The service, quality product, and competitive price they receive has led to a longstanding partnership.

March 2009

As the specialists in generator and UPS hire, sales, leasing and maintenance, Generator Associates were chosen to provide a research department with an 800Kva diesel generator solution complete with bunded fuel tank and cabling. The client required the equipment to test their off air exhauster units, & initially were looking for a short term solution, so Generator Associates provided the equipment on hire, with the client benefiting from the standard, value added services such as the 24/7 emergency call out and regular maintenance. The high quality service the client received led them to continue to use Generator Associates on a continuing long-term basis, until a decision is made regarding upgrading their mains supply. At this stage Generator Associates will provide various auxiliary products.

Generator Associates hire & service teams are one of the largest in the UK. The quality hire products and transport facilities alongside their first class customer service and market knowledge means they offer one of the highest quality and cost effective generator hire services in the country. By using their own transport and service engineers, they offer hire clients a rapid response and expert service nationwide.

This particular client has both governmental and commercial organisations as customers, and like many others cannot afford to let their service or projects fall behind just because mains power providers are unable to install the required level of power for months or years on end. They needed to be proactive and ensure they could perform at all times.

They hire a range of generators from 50-1500Kva in individual sets, but can synchronise various sets to achieve much greater power such as 3000Kva. They also offer a range of auxiliary equipment including bunded fuel tanks, cable, distribution equipment, trailers and security containers. They provide generators to clients in various industries including manufacturing, services, construction, utilities, events, telecommunications and offshore. Keep an eye on www.generatorassociates.com for more details.

Whether it is a diesel, petrol, gas or bio fuelled generator or UPS hire, sales or rental you require, Generator Associates can offer sound advice and cost-effective solutions to exceed your expectations.
