Major Fresh Food Producer Chooses Generator Associates to Provide Installed Power for Expanding Production Facility and Refrigeration Units

E: enquiries@generatorassociates.com
W: www.generatorassociates.com

A major UK fresh food manufacturer has chosen Generator Associates to provide a 500Kva SDMO diesel generator solution to power their rapidly expanding production facilities.

November 2006

Generator Associates, the specialists in generator hire, sales, supply and leasing, have won the contract to supply an established UK fresh food manufacturer primary power, because their mains power supplier is unable to provide sufficient power. The manufacturer has recently experienced rapid growth and is expanding their newly modernised production facility. The client required a generator solution because their national mains electricity network provider were unable to upgrade power supply needed for their new production facility, without the massive cost of building a new electricity substation.

This is why more and more manufacturers are choosing a more cost-effective option – to generate their own power with a diesel generator from Generator Associates Ltd. Generator Associates Ltd provided short-term generator hire whilst they worked with the organization to decide what generator solution they required to meet their longer-term needs. They also continue to provide fuel management services so that their client has a completely outsourced solution – saving them time and money.

The 500Kva Volvo engine SDMO generator is being used to power refrigeration equipment and production lines, and with further expansion on the cards, their power requirements are set to rise. They also choose an external 18,000 litre fuel tank to ensure the factory can keep working. The organisation chose a generator solution on a special generator lease, because they saw the benefits including the low cost monthly rental and peace of mind extended warranty terms.

Generator Associates provided a 200Kva and 500Kva hire generator, fuel tank, fuel and project management for this client, and are happy to be working with another established customer led family business. Whether it is a diesel generator or UPS hire, sales or rental you require, Generator Associates provide a range of new and used generators and UPS systems to exceed your expectations.

For Immediate Release
