

Press Release WEEE Needs Power – Generator Associates Provides It.

E: enquiries@generatorassociates.com
W: www.generatorassociates.com

Generator Associates Ltd are delighted to once again be working with Environmental Storage Solutions Ltd, a market leading waste carrier and broker – who provide treatment for end of life plastic, refrigeration and waste electrical equipment.

January 2008

The Requirements:

Environmental Storage Solutions are a market leader in the recycling and disposal of end of life plastic, refrigeration and waste electronic equipment, and have for the second time this year chosen Generator Associates to provide power for their equipment. Numerous WEEE (Waste Electrical and Electronic Equipment) legislation has been introduced since 2004. The client opened their 60,000 square foot factory to deal with treatment and destruction before the legislation was enforced so that they were able to prepare for the high demand when the relevant legislations were introduced. The legislation limits the quantity of waste that can go into final disposal and so needs to be recycled. They are able to deal with the redundant equipment which exists due to the Ozone Depleting Substance legislation. They needed a 1000Kva diesel powered generator to provide reliable power to a slow speed high torque twin shaft shredder, a ring mill, a rasper and a granulator.

The Solution:

Generator Associates Ltd, the power hire, sales, leasing and maintenance specialists were chosen to work alongside the WEEE specialists to provide over 1000Kva of power to run their equipment. Because this marketplace is constantly changing and their needs altering, Generator Associates provided a 1000Kva silent diesel generator complete with 3000 litre external bunded bulk fuel tank and cable on short term hire.

Whether it is Generator or UPS sales, hire, lease or maintenance you require, Generator Associates act as independent consultants and offer complete one-stop solutions for waste disposal organisations like Environmental Storage Solutions along with a range of other commercial, governmental and industrial organisations throughout the UK. If you need a reliable and competent Generator and UPS supplier and installer who can offer a range of services including Project Management and Fuel Management, contact Generator Associates today and let them start finding the most cost-effective solution for you.

For Immediate Release
